Meeting the Transformation Goals of the Public Sector

We've worked with Public Sector customers for many years. We understand the tough financial challenges you face and how complex Public Sector procurement procedures can be. That's why we're delighted to be an approved supplier on the CPC framework.

Switching to more digital ways of interacting can help you deliver better outcomes for your communities. When done right, it also enables you to control (or reduce) the cost to serve — a significant benefit, given the constant need to find efficiency savings.

We look forward to supporting your organisation on its paper-to-digital transformation journey.

Scanning and archiving

Redefine the way you handle physical and electronic data capture with our Capture and Content Services. Leveraging powerful AI and machine learning, you can automatically capture and validate information from digital or physical documents. Take information from any source (including ad-hoc scanning, batch scanning, or captured digital-native) and feed important data and metadata directly into the processes that need it.

Electronic Document Management Systems and Services

Xerox® DocuShare® is a content management platform designed to spark peak performance at your organization. When your company's digital files are on Xerox® DocuShare®, your staff can access the documents, images, layouts and presentations they need to collaborate, make informed decisions and get things done. By having all files in one place, DocuShare® improves workflow, and makes it easier to stay organized and stay on track.

Mail Management

A fully managed service to transform your mailroom. With Xerox® Digital Mailroom Service you can automate the capture of all incoming correspondence, whether delivered on paper, in an email, via fax or at the point of origination, and deliver structured electronic information to your business processes and systems.

Hybrid Mail

Multichannel inbound and outbound communication with your customers - in whatever format they require; SMS, email, or post. Significantly reduce the associated costs of your traditional mail service, whilst unleashing staff productivity and efficiency. Bring new ease of use, simplicity and efficiency to delivering correspondence to your customers.
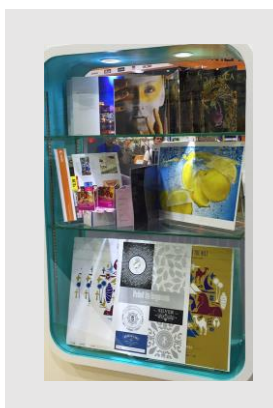

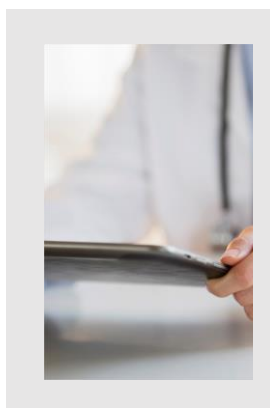

Multifunctional Devices and Digital Transformation Solutions from Xerox

External print

Our market leading communications platform facilitates the ordering, printing and delivery of printed matter to agreed SLAs; all governed, managed and deployed by Xerox. We also work with our customers to digitise, re-engineer and re-focus their communications to drive down cost and drive up impact.
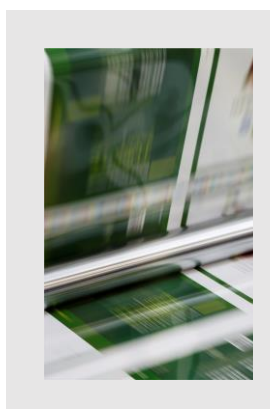

Document Storage and Distribution Services

A fully managed service to store and digitise your legacy paper archives. We help you to stop creating new paper, while managing and evolving your old paper stores using our various scanning services. We have a proven track record of working with sensitive patient records in a secure and compliant way to enable clinicians to access records at the point of need, and freeing up storage space for much needed clinics.

### Multifunctional Devices and Associated Supplies and Services

Managed Print Services, under an expanded model of Intelligent Workplace Services, includes security, digitization, cloud, analytics and ConnectKey technology. MPS helps you gain visibility and control of printers and their associated output, supplies and support, and improves the way you use documents, saving you money, time and steps.

High Volume/production print devices and associated supplies and services

Our comprehensive range of Production Devices and associated services include:
• Market leading production print devices
• Print management software.
• Specialist printing consumables.
• Maintenance and support services.
• A range of professional services to support these devices.
• Print audit services and relevant consultancy services.

Cloud Services

Transition away from hosting servers and their associated applications yourself and implement both IAAS (Infrastructure as a Service) and SAAS (Software as a Service), reducing your overall on site footprint in addition to digital transformation.
